

Caring
for your
Countertops
maintenance
tips to keep
them beautiful

CINCINNATI
STONWORKS

granite * marble * natural stone

Now that you have your countertops installed, below are some suggestions to help you maintain their beauty for years to come. Thank you for choosing Cincinnati StoneWorks!

Do!	Don't!
DO Clean surfaces with mild detergent or stone soap.	DON'T Use glass cleaners, bleach, ammonia or any other de-greasers as cleaning agents.
DO Thoroughly rinse and dry the surface after washing.	DON'T Use vinegar, lemon juice or other cleaners containing acids on marble, limestone or travertine.
DO Blot up spills immediately.	DON'T Use cleaners that contain acid such as bathroom cleaners, grout cleaners or tub & tile cleaners.
DO Protect countertop surfaces with coasters, trivets, cutting boards or placemats.	DON'T Use abrasive cleaners such as dry cleansers or soft cleansers.
DO Use 409 Stone & Steel Cleaner. It's safe to use, inexpensive and can be purchased from your local grocery or hardware store.
